Matthew King, a Booz Allen Hamilton Associate, has six years experience in the Information Assurance field. Mr. King provides technical support to the Information Security (INFOSEC) System Security Engineering (ISSE) Support program. Mr. King leads the Information Assurance Research support task, which provides security engineering and management support to the National Security Agency's Secure Network Technology Office.

Mr. King is the current chair of the Biometric Consortium's Assurance Ad Hoc Group.

Previously, Mr. King supported the Key, Privilege, and Certificate Management Support task. This support included analysis, evaluation, and maintenance of PKI-related standards from many organizations. Mr. King also wrote a Certification Practices Statement (CPS) for the Information Operations Technology Center's (IOTC) PKI.

Mr. King co-authored a paper for the Information Assurance Technology Analysis Center (IATAC), which explored the state of a segment of the biometric industry-specifically, fingerprint identity verification technologies.

Mr. King received a B.S. degree in Information Systems from the University of North Carolina at Greensboro. He is currently pursuing a M.S. degree in Computer Systems Management at the University of Maryland.
